

LeadMax

Project Structure & File Guide

Sales Lead Management & Call / WhatsApp Engagement Platform

FastAPI + Next.js | Generated 2026-06-15

Root

Path / File	What it is / Use
dev.sh	One-command dev launcher: Postgres (if needed) + API (:8000) + web (:3000).
docker-compose.yml	Postgres 16 container, exposed on port 5433.
CLAUDE.md	Project instructions for Claude (use the code-review-graph first).
README.md	Project overview and setup guide.
.env.example	Template of backend env keys (no secrets).
.gitignore	Ignores .env, node_modules, .next, .venv, caches, graph DB.
.mcp.json / .vscode/mcp.json	Code-review-graph MCP server config (portable).
.github/	Code-review-graph instruction doc.
.code-review-graph/	Local knowledge-graph DB (git-ignored, per-machine).
.design-handoff/	Notion design-system tokens reference.
docs/	PRD.md, Phase1*, OAuth-Integrations.md, Build-Summary.md.

Backend - apps/api/

Entry & configuration

Path / File	What it is / Use
app/main.py	FastAPI app; registers all routers.
app/config.py	Env settings (Pydantic): DB, JWT, FB/Meta, SMTP. Strips whitespace from credentials.
app/database.py	Async SQLAlchemy engine + get_db dependency.
app/dependencies.py	Auth guards (require_company_admin, get_active_user) + hierarchy visibility.
requirements.txt	Python dependencies (Python 3.14-compatible).
alembic/	DB migrations: initial -> social-auth -> hierarchy_management.

Models (app/models/)

Path / File	What it is / Use
Database tables	user, org, lead, activity, deal, task, engagement, integration, audit, notification.

Routers (app/routers/) - API endpoints

Path / File	What it is / Use
auth.py	login / signup / change-password / /me.
users.py	Create heads/employees, org /tree, CRUD, reset-password.
dashboard.py	Role-aware stats.
leads.py	Leads, hierarchy-scoped visibility.
integrations.py	The Facebook/social connect flow: connect -> callback -> discover -> install -> profiles.
webhooks.py	Meta lead webhook receiver (verify + leadgen).
audit.py / notifications.py	Audit log and notifications.

Connectors, Services, Schemas, Tests

Path / File	What it is / Use
app/connectors/	facebook.py (OAuth + Pages + lead capture), instagram, linkedin, whatsapp, base, registry.
app/services/	auth, credential (employee codes/temp passwords), crypto (token encryption), email, notification, audit.

Path / File	What it is / Use
app/schemas/ tests/	Request/response models: auth, user, lead, integration. test_hierarchy.py (RBAC, tenant isolation) + conftest.py.

Frontend - apps/web/

App shell & config

Path / File	What it is / Use
layout.tsx	Root layout; loads fonts via next/font (no flash).
providers.tsx	App-wide providers (NextAuth session).
middleware.ts	Forces password change on first login.
globals.css	Theme tokens (light/dark), animations.
tailwind.config.ts / next.config.ts	Tailwind + Next.js config.

Landing page (src/app/)

Path / File	What it is / Use
page.tsx	Landing page: hero, features, pricing, contact.
_components/LandingNav.tsx	Floating glass nav + theme toggle.
_components/ThemeProvider.tsx	Light/dark theme context (localStorage).
_components/HyperText.tsx	Scramble heading + rupee-hover effect.
_components/AvatarCircles.tsx	Social-proof avatar row.
_components/DotPattern.tsx	Dotted hero backdrop.
_components/PlatformSnapshots.tsx	4 floating FB/IG/WhatsApp/LinkedIn cards.

App pages

Path / File	What it is / Use
(auth)/login, (auth)/signup	Auth screens.
change-password/	Forced first-login password change.
dashboard/	Role-aware dashboard cards.
users/	User management + OrgChart.tsx + create/credential modals.
org/	Org chart page.
audit/	Audit log.
integrations/	Social Profiles: SocialProfiles, ProfileSelectModal, oauth-bridge, profiles/[id].
onboarding/	Onboarding flow.
api/auth/[...nextauth]/	NextAuth route handler.

Shared

Path / File	What it is / Use
components/layout/	AppShell.tsx (sidebar/nav), NotificationBell.tsx.
lib/api-client.ts	Typed API calls.
lib/auth.ts	NextAuth configuration.

Validation Summary

- Removed: .claude/settings.json.bak, apps/api/.env.bak.* (old secret), apps/api/.pytest_cache/.
- Generated/ignored correctly: .next/, .venv/, __pycache__/, *.tsbuildinfo, .code-review-graph/, .env*.
- Structure: clean - clear separation of models / routers / services / connectors (backend)
- and components / pages / lib (frontend). No dead or duplicate files found.
